Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art, and in view of Lee et al (U.S. 6362892).

Regarding claims 1-2, applicant admitted the prior art teaches a printer driver (fig. 1), provided at a host computer (host computer, page 2, lines 1-20) while said host computer is connected to a stencil printer printing machine through communications (page 2, lines 1-20), for setting items of various conditions for said stencil printing machine, wherein the various setting items for said printing conditions are displayed; a watermark (fig. 1) print item is selected on the setting items; and information on the items are transmitted, together with the print data, to the stencil printing machine (applicant admitted the prior art teaches a stencil printer having "secret operation" as show in fig. 1, page 2, lines 1-20).

However, applicant's admitted prior art does not teach printer's features such as "secret operation" can be incorporated into the printer driver, which allows operator to control printer's features via from a host computer.

Lee, in the same field of endeavor for printer driver, teaches a method for incorporating the printer's features/capabilities into the printer driver, which allows operator to control printer's features via a host computer (printer driver which incorporated in the host computer for controlling features/capabilities of the printer, figs. 2-7, col. 1, lines 34-50 and cols. 4-6).

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to modify applicant's admitted prior art as per teachings of Lee

Art Unit: 2624

because of a following reason: (1) to allow operators/users to control printer's capabilities/features of the printer remotely; therefore, reduces operating costs.

Therefore, it would have been obvious to combine applicant's admitted prior art with Lee to obtain the invention as specified in claims 1-2.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

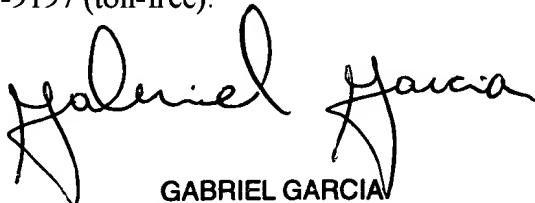

(1) U.S. 6426798 to Yeung, discloses a method for incorporating printer's capabilities/features into the printer driver, which allows operators/users to control the printer remotely from the host computer.
